

Switchvox[®]

It's more than a phone system.
It's a better way to communicate

Saves You Money

With Switchvox, all features are included. No longer do you have to wade through complex and expensive feature licenses to get the experience you need from your phone system. Customers can save up to 70% on their monthly expenses in telephony and service charges by taking advantage of more cost effective technology like SIP trunking without additional hardware costs.

Powerful Unified Communications Features

Switchvox is more than just a phone system. With powerful unified communications features out of the box including presence, instant messaging, mobility, conferencing, and voice-mail /fax to email, Switchvox will change the way you communicate with your internal and external contacts.

Easy to Manage

An intuitive, web based, point-and-click interface allows you to manage every aspect of Switchvox whether you are in the office, working from home, or in a coffee shop. Lighten your IT load by empowering your employees to control their own Find-Me/

Switchvox is the Best Communications System for Your Business

The combination of the Switchvox system and Digium phones provides a complete communications solution for small and mid-sized businesses. It's more than a phone system – it's a better way to communicate. This Unified Communications system integrates all of your office communications, including phone, fax, chat and web conferencing. Customize your communications experience right down to the phone. Access call queues, your presence, and the applications you need, right on your desk phone.

The business world is quickly becoming mobile and with the Switchvox Mobile App, our web-based Switchboard and user interface, your employees will be productive from anywhere. The system also has tools that can connect to your existing software and applications to better arm you users with information when your contacts call you. Talk about flexibility!

Follow-me rules, voicemail boxes, and conference rooms. Many of Switchvox's extensive features can be accessed from any device you choose including your desk phone, mobile device, or through the PC.

Features local language support

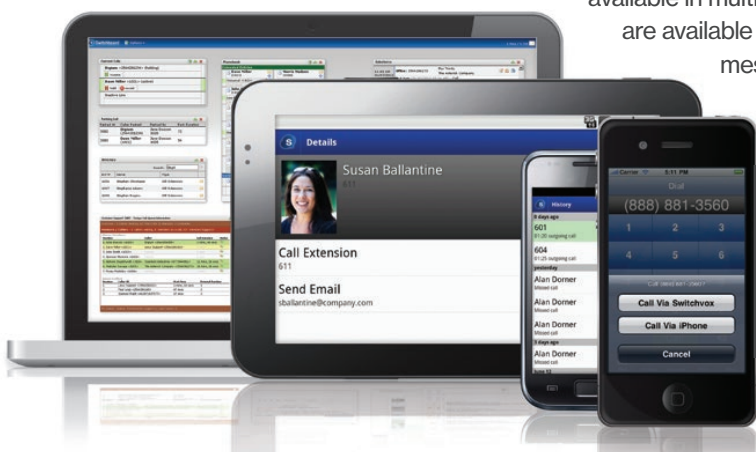

Switchvox and Digium phones have built-in multi-language support for use around the world. Not only is the Switchvox interface available in multiple languages, soundpacks are available for professional voice messaging. Digium phones are available in 7 languages,

including Spanish, Portuguese, English, French, Italian, German, and Dutch!

Who is Digium?

Digium's VoIP solutions provide a competitive edge for small, mid-sized and large businesses. Digium's product lines include Asterisk custom communications, Switchvox Unified Communications (UC), and a family of HD IP phones that delivers enterprise-class features at a price businesses can afford.

Digium is the creator, primary developer and sponsor of Asterisk, the world's most widely used open source communications software. Asterisk turns an ordinary computer into a feature-rich voice communications server. Switchvox is the award-winning, UC solution built on the power of Asterisk with thousands of installations worldwide.

Switchvox Mobile helps maintain your brand by allowing users to make outgoing calls to your clients with your company caller ID.

Digium. The Asterisk® Company.

Digium is the creator, sponsor, and innovative force behind Asterisk, the industry's first and world's most popular open source telephony software. Additionally, Digium provides a variety of VoIP communication solutions that fit the needs of small, medium, and large businesses. Digium's product lines include commercial business phone systems, as well as software, hardware, and other components needed to create powerful custom telephony solutions.

Business Communications Systems

Digium's line of award winning Switchvox IP PBX phone systems are built on a strong foundation of our open source Asterisk software. Switchvox solutions are designed to be extraordinarily easy to use and provide features that most small and medium businesses had previously considered out of their reach.

Switchvox's web-aware unified communications capabilities are unique in an industry cluttered with old technology. Integration with web and back office applications turns your phone system into a powerful platform for employees' productivity and efficiency. Its web-based Switchboard provides an intuitive control panel to assist with call management in real time while unifying phone calls, faxes, e-mails, instant messaging, Google Maps, CRM systems and other web tools from an easy-to-use, centralized control panel.

We're able to offer these PBX systems with superior capabilities for a fraction of the cost of traditional vendors' products because the shift to an open source software foundation represents a dramatic leap forward in telephony technology.

Custom Communications Systems

Digium empowers users, developers and integrators to build custom telephony solutions by offering a variety of software, hardware, and third-party components. From a simple phone system, to a sophisticated telephony application, Digium makes it possible for the world to communicate in an infinite number of ways at a fraction of the cost of proprietary solutions.

At the heart of these offerings is Asterisk, the powerful open source telephony development toolkit. Asterisk is free software that turns an ordinary computer into a feature-rich voice communications platform. Its flexible architecture lets you configure it as an IP PBX, a voicemail server, IVR server, VoIP gateway, call recorder, automatic call distributor and virtually any other voice-enabled application you can imagine.

To support Asterisk-based solutions, Digium offers a full line of high quality analog and digital interface cards to connect your solution to the public telephone network. In addition, Digium offers add-on software components like Fax For Asterisk, G.729 codec, and high performance echo cancellation (HPEC) to enhance your solution.
